

## What is Your Chinese Constitutional Type?

To find out, look at the list of symptoms in each category. Open this form in Excel and print it. If you currently have a problem with that symptom, put a check in the column marked "present problem" across from the symptom. If the problem has also been a problem in the past, put a check in the column marked past problem. If you used to have a problem with that symptom, but it is no longer a problem, you should still put a check mark in the past problem column.

Total the number of check marks in each column then place the combined total of both columns in the last box. After completing the entire questionnaire and totaling all of your scores, record them here. Adding each row and column gives you your total scores for each element and for excess and deficient symptoms.

To fill out electronically, open in Excel, put a "1" in each applicable box, the totals will show in each subsection and at the end. Email the completed form back to me or print it up and bring it with you or mail it.
